

## EMMANUELLA DOH, M.D.

---

Emmanuella Doh, M.D., is an accomplished physician with over nine years of expertise in clinical research, specializing in clinical trial management, site management, and psychometric ratings for neurology and psychiatry studies. She has successfully overseen trials in Phases 1-4, ensuring regulatory compliance and leading cross-functional teams to achieve optimal study outcomes. Dr. Doh's extensive experience in training staff on psychiatric and cognitive scales underscores her commitment to high data quality and study integrity. Additionally, her ability to foster strong relationships with site staff and stakeholders has played a crucial role in enhancing trial efficiency and collaboration.

As Director of Clinical Research Operations, Dr. Doh has directed all phases of clinical trial operations, including site selection, initiation, and monitoring, while adhering to GCP, ICH, and regulatory standards. She has built lasting relationships with sponsors and investigative sites, ensuring successful site engagement and patient recruitment strategies. Her leadership also includes overseeing training on clinical assessments and psychometric scales to ensure compliance with clinical protocols.

Previously, Dr. Doh served as Director of Rater Training and Content Development at Winsantor Inc., where she developed and delivered comprehensive training on clinical assessments. She also reviewed and approved publications, ensuring alignment with reporting standards and high-quality data execution. Her earlier roles as Clinical Research Monitor at ICON Clinical Research and Psychometric Rater/Sub-Investigator at Cenexel ACMR further strengthened her expertise in site management and protocol compliance across psychiatric trials.

Beyond her clinical operations work, Dr. Doh has contributed significantly to academic research in neurology and psychiatry. She has authored numerous articles in national and international journals, including a groundbreaking study in Sub-Saharan Africa, which marked a milestone in regional clinical research. Her research continues to shape best practices and innovative clinical protocols in the field.

Dr. Doh is also the Founder and CEO of Ease Insight Consultancy, LLC., a clinical research training and consulting firm launched in 2023. Through the firm, she provides strategic training and guidance to clinical research professionals and organizations, improving their operational efficiency, regulatory compliance, and research quality. Dr. Doh's deep knowledge of site management, psychometric assessments, and clinical trial execution is dedicated to empowering the next generation of clinical researchers globally.

Dr. Doh holds a medical degree from the Faculty of Medicine & Biomedical Sciences in Cameroon and a Master of Public Health from Edinburgh Medical School, UK. Fluent in English and French, she actively participates in scientific meetings, representing her organization and advancing the field of clinical research.
